

ExESS Software aims  
**simple but efficient**

- inventORIZATION
- reporting
- managing

of all your **Environmental, Health and Safety needs (EH&S)**.

### **Managing Director**

**Accurate fact and figures**

You don't want to risk production failures or production stops. Your business strategy is based on respect for the environmental, safety and health requirements totally compliant with international legislation.

ExESS supports you to take the best business decisions.

### **IT Manager**

**Integratable IT components**

You don't lose time developing your own EH&S software. However, you are looking for professional high quality IT components, easy to use and easy to integrate in ERP applications.

ExESS assures efficient implementation and integration of all your EH&S requirements.

### **Environmental, Prevention and Facility Manager**

**A useful tool focusing on your proper objectives**

You need permanently accurate lists of assets: risks, installations, activities, measurements and products. Compliancy with legislation is obvious. Data collection, data management and EH&S becomes easy, efficient and transparent.

ExESS gives you full control of all your environmental, health and safety aspects.
